Poll Questions: Your Experience With Data Systems

Please answer the following poll questions:

What is your role in tribal child welfare?

Have you participated in developing or reviewing a contract before?

Did you join or watch Parts 1 and 2 of this webinar series?

Chat Questions: Your Experience With Data Systems

Please share in chat:

What are some challenges you anticipate when developing a contract for a data system?

Contracting with Data System Vendors

Why is contract language so important?

- Does the contract establish clear expectations, roles, and responsibilities?
- Are all verbal agreements in writing?
- Does the contract protect the tribe's interests?
- Who will review the contract?

Chat Questions: Your Experience With Data Systems

Please share in chat:

What elements do you think should be included in a contract for a data system?

Procuring a Tribal Child Welfare Data System

What elements should a data system contract include?

Statement of work

Product development process

Price and payment

Data ownership, confidentiality, security

Intellectual property

Source code

Hardware requirements/ownership

User acceptance testing

Data conversion/migration/cleaning

Training and documentation

Maintenance, operations, and license costs

Roles and responsibilities (agency and vendor)

Right to approve subcontractors and remove individuals

Contract termination/suspension

Responsibility for federal reporting and correcting data quality issues

Standards and compliance

Risk management

Disaster recovery and business continuity

Malicious code, open-source code, and software bill of materials

Webinar Series Available on YouTube

Part 1: Planning for a New Data System
